

# SR8301439 [Sears Mid-Back Seat, Brown Fabric w/Air Suspension]

Instruction Guide

## Installation instructions to replace an original deluxe mechanical seat and suspension with SR8301439 and air suspension in a John Deere early 30 Series Row Crop Tractor

1. Remove the original seat and suspension
2. Install the Seat Well Extension Kit following the instructions at the bottom of this page
3. For models with the slanted front section on the seat well, bolt plate (A) to the bottom of the pedestal with two 5/16" x 3/4" carriage bolts and flange nuts. For models with the square front section, use plate (B)
4. Bolt the suspension to the pedestal with four 8mm x 16mm bolts. Use four 7/16" spacer nuts as spacers between the suspension and pedestal
5. Mount the pedestal to the back of the cab with the original bolts
6. Drill two 5/16" holes through the support plate on the bottom of the pedestal and fasten with two 5/16" x 3/4" bolts and flange nuts
7. Connect the suspension to a power source and ground

### S8301392 – John Deere 30 Series Seat Well Extension Kit (for tractors with 7-1/2" wide seat well)

- 2a. Cut out 4-1/2" of the cab metal from the left side of the existing seat well cavity (use of a Sawzall is recommended)
- 2b. Place S8301392 into the opening from the bottom side and fasten with sheet metal screws. Use a 5/32" drill bit for the holes
- 2c. Proceed with installation step #3 above
