

- Place the clutch housing (M515875) on the assembly table with the large opening upward
- 2. Assemble and install the piston and sealing rings on the housing as specified in the service manual
- 3. Insert one of the supplied clutch plates into the housing with the lobes of the plate inserted into the serrations
  - a. Make sure the clutch plate rests against the piston (not shown)
- 4. Install the supplied piston return springs against the lobes of the piston plate

5. Carefully install the clutch disc on top of the clutch plate

- 6. Install the remaining clutch plates and discs into the housing
  - a. Make sure that each successive clutch plate's lobes are staggered alternatively one serration from the previous plate's lobes
  - b. Attempt to line up the splines of the clutch discs as they are installed

## M830472 [IPTO Clutch Kit]

Instruction Guide

- 7. Install the clutch retainer plate (reused core) on top of clutch assembly (not shown)
- 8. Compress the assembly and install the supplied pins in the oiling holes of the clutch housing to hold down the assembly

9. Install the snap ring and remove the pins
